

## Green Screen Assignment

The green screen is used to create the illusion that something or someone is in front of a completely different background. This background could be a still picture or a movie. Adobe Premiere allows you to layer one on top of the other while eliminating the green background.

Your assignment is to create 3 short green screen scenes (total of 30 seconds or less). You may share the green screen video with a partner but you need to come up with different backgrounds.

Ideas:

- be a superhero flying through hallways
- be a giant among ordinary students
- travel to Paris, Calcutta or Tokyo
- talk with Darth Vader, President Obama or Homer Simpson
- be as small as a bug trapped on a lunch table, or perhaps jump up and down on a computer keyboard
- Walk away from an explosion in slow motion (sunglasses recommended)
- Float in space or in a spaceship.
- Go on Safari, tell us about some majestic wildlife.
- Make a weather announcement
- Give a "tour" of a world monument or even SMS.
- Dance off vs. yourself (Use split picture)
- Talk to a mini hologram (Use picture in a pictures)
- Do something dangerous (climb a mountain, surf a killer wave, skydive, etc)
- Your Choice, let your imagination go!

**Directions**

- Create a Webpage in Google Sites titled “Greenscreens”.
- Complete the storyboard planning using google slides and insert into your webpage with a Heading titled “STORYBOARD”.
  - USE GOOGLE SLIDES AND create a Four page slideshow storyboard that has the following;
    - Title Slide
    - THREE more SLIDES (Write a name or explain the setting used in each slide. Explain your actions, movement, scene to accompany the setting in slide.)
- Use a textbox and a heading titled “”Your Name”-Green Screen Episodes or adventures or series”.
- Upload your movie to Drive and then insert into your webpage on your website.

## **GRADING**

**CONTENT:**

- Opening title
- Three green screen scenes
- Video Editing of backgrounds is clean and effective
- Video Effects (Title, transitions, etc) are appropriate and enhance narrative
- Audio is clear and effective.

**ADST CURRICULUM Content:****Media Arts**

- digital and non-digital media technologies, their distinguishing characteristics, and their uses, including layout and design, graphics and images, and video production techniques for using images, sounds, and text to represent characterizations and points of view of people, including themselves, as well as settings and ideas
